

Summarized Meeting Minutes

Project Name: Financial and Operational Analysis of U.S. Hospitals Using Hospital Provider Cost Report Data (2011–2022)

Date & Time:

Consolidated Review (Covers Meetings: Sept 9 – Nov 11, 2025)

Location:

St. Clair College / Microsoft Teams

Meeting Type:

In-Person & Online

Attendees

Name	Student ID	Role
Manjunath Muthineni	0878795	Team Leader & Data Integration Lead
Rajesh Thota	0873782	Documentation & Reporting
Neha	0873038	Research & Methodology Lead
Abhishekh Choudhary	0873460	Data Cleaning Lead
Krishna Chaitanya Venuturumilli	0874277	Visualization & Analytics Lead
Professor Manjari Maheshwari	—	Faculty

Agenda Item 1: Team Formation & Dataset Selection

Discussion:

- Members introduced themselves and selected WhatsApp as the primary communication tool.
- Multiple datasets were reviewed; the Hospital Provider Cost Report dataset (2011–2022) was selected due to its financial, operational, and geographic depth.
- Initial responsibilities were assigned across research, data extraction, cleaning, EDA, and documentation.

Action Items:

Task	Assigned To
Create and manage the WhatsApp group	Manjunath
Review dataset documentation	All Members
Conduct preliminary data quality checks	Abhishekh & Krishna
Begin literature review	Neha
Set up shared documentation structure	Rajesh

Agenda Item 2: Data Integration & Missing Values Assessment**Discussion:**

- Multi-year CMS files were successfully combined.
- Column inconsistencies across years were identified.
- Missing values, especially in financial fields, were reviewed and categorized.
- Team discussed imputation, removal, or deriving replacement values.
- Importance of understanding missingness patterns was emphasized.

Action Items:

Task	Assigned To
Validate column consistency	Manjunath
Document integration approach	Rajesh
Generate missing value heatmap	Krishna
Prepare missing-value handling proposal	Abhishekh
Review major outliers	Neha

Agenda Item 3: Data Cleaning Planning & KPI Framework

Discussion:

- Cleaning tasks were outlined:
 - Standardizing data types
 - Removing duplicates
 - Correcting outliers
 - Cleaning geographic fields
 - Establishing naming conventions
- Cleaned dataset was approved for EDA.
- KPIs defined for dashboards: Profit Margin, Expense Ratio, Current Ratio, Debt-to-Asset Ratio.
- Plan created to generate a KPI-ready dataset after initial EDA.

Action Items:

Task	Assigned To
Export cleaned dataset	Abhishekh
Verify numerical columns	Neha
Create KPI-ready dataset	Manjunath
Begin preliminary EDA	Krishna
Prepare column renaming plan	Rajesh

Agenda Item 4: Dashboard Tool Selection & Documentation Updates

Discussion:

- Tableau was ruled out due to version limitations; **Power BI** confirmed as the official visualization tool.

- Preliminary dashboards identified:
 1. Financial
 2. Operational
 3. Geographical
- Final Overall Summary Dashboard confirmed for final submission.
- Professor requested formatting fixes for the Project Charter; BRD to undergo final review.
- WBS was confirmed *not* required.

Action Items:

Task	Assigned To
Develop dashboards in Power BI	All Members
Align design & visual consistency	All Members
Plan Final Overall Summary Dashboard	Krishna & Manjunath
Refine BRD	Manjunath
Apply formatting updates to Charter	Rajesh

Agenda Item 5: Dashboard Progress & GitHub Workflow

Discussion:

- Progress Updates:
 - Dataset preparation & GitHub structure completed (Manjunath)
 - Preliminary dashboards completed (Neha, Abhishekh, Krishna)
 - Documentation ongoing (Rajesh)
- GitHub collaboration structure established:
 - PBIX dashboards to be uploaded
 - README.md and requirements.txt updated after each push
 - Consistent commit messages required

Action Items:

Task	Assigned To
Upload data cleaning code	Abhishekh
Upload EDA code	Krishna
Upload PBIX dashboards	All Members
Update README & requirements	Rajesh
Finalize dashboard formatting	All Members

Agenda Item 6: Final Dashboard Completion & Presentation Storyline

Discussion:

- No further meetings will be held.
- Team will focus on:
 - Refining all dashboards
 - Creating the Final Summary Dashboard
 - Building a presentation with a clear analytical story
 - Preparing Power BI screenshots and demo flow
 - Finalizing all documentation and GitHub updates
- Work will continue asynchronously.

Action Items:

Task	Assigned To
Finalize all Power BI dashboards	All Members
Develop story-driven presentation	Entire Team
Prepare slide deck	Rajesh & Manjunath
Practice transitions and timing	All Members
Complete remaining GitHub uploads	All Members

Additional Notes

- All preliminary development is complete; project has moved to final polishing.
- Dashboard design consistency and KPI accuracy are mandatory for final submission.
- Documentation must be kept updated in GitHub.
